

EXPANSION OF MAHOGANY RELOCATION SITE'S LEVEL 3 WATER SUPPLY SYSTEM

Now that the expansion of the Level 3 Water Supply System Project has already been completed, some one hundred fifty-nine (159) households at the Mahogany Relocation Site in Calaanan will now be able to apply for individual service connections. The project, financed by LWUA's PhP 63 Million Fund (Fiscal Year 2015 Rehabilitation and Reconstruction Program Fund), was implemented by the Cagayan de Oro City Water District (COWD). The PhP 7,644,009.00 project included installation of 150mmØ, 100mmØ and 75mmØ distribution lines with 16 meter stub-outs.

Representatives of the Commercial, Management Services and Engineering Departments facilitated an advance offsite orientation-Seminar for new service applicants last March 22, 2019 so the residents can comply with this basic requirement and prepare the necessary requirements.
